## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 11-28 and 35 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 11, 13 and 15-25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 11, 13 and 16 claim a living tissue. Claim 11 positively recites a cardiac valve in lines 11 and 15 and leaflet bases in line 12. Claim 13 positively recites a valve anulus in line 14 and leaflet bases in line 14. Claim 16 positively recites each leaflet base in line 13. The living matter of the present invention is not the result of human intervention; it is of nature, which has been held not patentable.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 23 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

Art Unit: 3738

regards as the invention. It is indefinite in view of the specification how a strip or band can be "net-shaped". Does the applicant mean the strip or band is made of mesh?

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-14, 18-20, 26-28 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Deem et al. (WO 00/609995). Deem et al. discloses a stabilization element having two ends that can be arranged across the atrial side of a cardiac valve (FIGS 69A-72B). The element can be applied endovascularly and steerably through an atria using a catheter (942). The element can comprise a plurality of wires (945).

Claims 11, 15-17 and 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Northrup (5,593,424). Northrup discloses a stabilization element having two ends that can be arranged across the atrial side of a cardiac valve (Fig. 10). The element can comprise a plurality of strips or bands (10). The distances between the leaflet bases can be adjusted by varying the length of the element (by lengthening or shortening the suture (60)).

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
